☐ Undergoing **DATA SCIENCE** Training in **QSPIDER'S** Vasai-Virar.

UNIVERSITY PROJECTS

BANKING SYSTEM Nov 2025

- I developed the core logic of the banking operation, implemented account authentication, handled file/ database storage and added validation to prevent invalid transactions.
- Challenges faced , ensuring data consistency during transaction and handling invalid inputs were the main challenges, which I solved using exception handling and validation checks.
- Tech Stack :-PYTHON, File handling/ MySQL

STUDENT MANAGEMENT SYSTEM 2025

- It's a python based student management system that digitally manages student records using crud operation and a database
- Where student data is stored in a database . I implemented functionalities for inserting, updating, deleting and retrieving student records using Python, with proper validation.
- Tech Stack :- Python , MYSQL

Technical Skills: Python , SQL (Database : MySQL , Oracle)

Tools: Pycharm, VS Code, Microsoft Office Suite (Word, Excel, PowerPoint, Power BI)
