

VISHAL YADAV

Full-Stack Developer | Python · Django · FastAPI · React.js · PostgreSQL

Lucknow, India • +91 87075 95797 • vishalyadav565262@gmail.com • linkedin.com/in/vishal-yadav592b08248 • github.com/vishalyadav56526256-svg

PROFESSIONAL SUMMARY

Detail-oriented full-stack developer with a demonstrated portfolio of end-to-end projects spanning React front ends, FastAPI back ends, and PostgreSQL databases. Skilled in architecting real-time systems with WebSockets, designing normalized, scalable database schemas with Alembic migrations, and implementing secure, JWT-based role access control. A motivated final-year B.Tech candidate (graduating 2026) with strong fundamentals in software engineering best practices, eager to bring a collaborative, problem-solving mindset to a first full-time role spanning the entire development lifecycle.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), SQL

Frontend: React.js, Axios, HTML5, CSS3, Tailwind CSS, Bootstrap, Figma

Backend: Django, FastAPI, REST API Design

Database: PostgreSQL, Alembic Migrations, Database Schema Design

Tools: Git, GitHub, Postman, VS Code

PROJECTS

HireHub — Job Portal Platform

Django, Python, MySQL, HTML, CSS

- Architected and developed a role-based job portal supporting Job Seekers, Employers, and Admins, each with tailored permissions and workflows.
- Engineered secure registration, login, session management, and profile modules to ensure reliable user authentication.
- Designed and implemented job posting, advanced job search, and end-to-end application management features.
- Integrated a MySQL database with optimized queries for efficient, secure data storage and retrieval.
- Crafted responsive, user-friendly interfaces to deliver a seamless experience across devices.

AI-Powered Job Analyzer

Python, Django, Generative AI (OpenAI API), HTML, CSS, Bootstrap, SQLite3

- Designed and built an AI-driven system to analyze job descriptions and extract relevant skills with high accuracy.
- Engineered skill-gap analysis and personalized recommendation generation powered by generative AI.
- Developed secure, scalable user authentication and data management modules using Django.
- Designed an intuitive, responsive user interface using HTML, CSS, and Bootstrap to maximize usability.
- Integrated third-party AI APIs to deliver intelligent, data-driven career guidance and job-matching insights.
